

### **Steve Filkin - Waste and Environmental Protection Specialist**

Steve has substantial experience in a variety of waste and environmental management roles, with particular expertise in regulatory interpretation and trouble-shooting. He has extensive knowledge of waste management ranging from resource recovery and recycling to clinical waste disposal and PPC permit management. His capabilities are underpinned by a keen interest in the practical application of innovative techniques and methodologies to resolve waste problems.

He is a Chartered Environmentalist and has an MSc in environmental practice from University of Surrey. He has experience in the pharmaceutical industry, regulation, local authority work, technical sales and contaminated land operations.

Steve's consultancy experience has included waste/environmental project work for a number of clients in various sectors including oil and gas, food and drink, waste incineration, paper and pulp manufacture and fine chemicals. Principal work areas have been Environmental Permit management, BAT reviews, environmental-business process integration, legislative interpretation, environmental risk assessment and regulatory compliance/performance auditing and facilitating resource synergies.
